

Indicator Lamp Series

In SL22 (LED) series of indicators is utilizing an LED shining chip as a light source. Thanks to the long life low consumption, small volume, and lightweight, it is a product replaced the older kind of incandescent lamp and indicator neon lamp by new ones, enjoying brilliant features: high brightness, perfect reliability, unique design and innovatively manufactured. To fit in with top quality and aesthetic demand of users, we developed SL22, double color lamp, position indicator, shining buzzer and mini short indicator, Metering indicators, which proudly meet all the requirements of international standard lamp shape, made of polycarbonate with high intensity, enjoying better anti-surge performance, and bolt-type connector designed has already made it safer, convenient and easy to use. The signal lamp series are suitable to the electrical appliance circuit of AC voltage up to 380V, 50Hz or 60Hz, DC voltage below 380V, used as kinds of indication signal, warning signal, accident signal, and other signals.
